

WELCOME TO BRISTLE, MARLON

What are you trying to do?

Tells us how to rank your feed, which signals to lead with, and what to suggest you save.

Indie founder

Looking for the next product to start. I want frequency, momentum, and willingness-to-pay signals.

Product manager

Already shipping. I want evidence to defend roadmap decisions to leadership.

Agency / studio

Build for clients. I want sharable briefs and category dashboards across multiple verticals.

Innovation lab / scout

Map emerging pain across categories. Team seats, shared collections, and an API matter most.

Researcher / student

Curious about product discovery. Need a flexible read of the data, not a dashboard.

Something else

Tell us in your own words. We tailor the dashboard based on your answer.

← Back

Your dashboard will lead with frequency and willingness-to-pay.
